ABOUT ME

I am a Computer Engineer with 4+ years of experience with an emphasis on Next JS, Langchain, Tensorflow, MERN Stack, and Google Cloud. I have experience creating a end-to-end real world solutions such as "ShareDoc" using NextJS, and ExpressJS which is file storing, and creates a shareable temporary link, and AI code assistant using Langchian, VS Code extension, React, TailwindCSS, FastAPI, and ExpressJS. I am actively looking for full-time, and contractual Jobs.

EDUCATION	WORK EXPERIENCE
MUMBAI UNIVERSITY Computer Engineer 7.7 CGPA 2017 - 2021	TERRA (BANGALORE) 2025 Feb - May - Created a code Assistant platform on Unity using React, ExpressJS, LangChain, and FastAPI that enhanced coding experience, and fastened the development speed 2x. - Worked on react embedded into unity platform, and React Native app.
SKILL - LangChain - TensorFlow - MERN Stack - Next JS - RAG - TailwindsCSS - PostgreSQL - Mongo DB - Docker - Serverless	EQAIM TECHNOLOGY AND SERVICES (NOIDA, UP) 2024 Apr - Nov - Converted a monolithic Koa Backend to micro-service architecture, and then deployed It on Kubernetes service. Worked on Full-fledged global product, and created 25% more efficient code to support it. - Together we reduced monthly cloud cost by 20%, increased code readability, and UI accessibility by 60%. INFOSYS PVT LTD. 2021-2023 Dec - I handled code review, development, and maintenance of code base. I also attended solution pitch to North Atlantic based clients, working on project of 10 years and company worth over 15B USD. - I used JQuery, HTML, CSS, Font Awseome, and SQL for full-stack solution product, and increased visibility in company production, decreased accidents, and reduced maintenance cost by 40%.

PROJECTS

AI Code Assistant	2025 MAY - AUG	ShareDoc	2023 FEB - MAR
- Its a VS Code extension that act as AI Code assistant. - It parses the code, creates a vector DB - It uses Multi-Query construction, Semantic chunking, and LangChain to provide services like optimize, and summarize the code.		Its a web application that provides users a way to store, share, and delete files into Google Cloud Storage, and later create a temporary link to share / access that file.
